EDUCATION

Brandeis University <i>Massachusetts, United States</i>	09/2022 ~ present
• Major: Ph.D. in Economics & Finance	Current GPA: 3.94/4.0
Columbia University <i>New York, United States</i>	09/2020 ~ 12/2021
• Major: Master of Arts in Economics	Overall GPA: 3.74/4.0
Shanghai University <i>Shanghai, China</i>	09/2015 ~ 07/2019
• Major: Mathematics and Applied Mathematics	Overall GPA: 3.71/4.0

RESEARCH EXPERIENCE

Working Paper:

Complex Technologies and Economic Value

- Developed an industry-level technological complexity measure using graph theory (Network Diversity Score) and built a CPC-to-NAICS mapping pipeline.
- Documented time-series and cross-industry patterns in complexity, including a steady rise pre-COVID-19 and a post-pandemic decline concentrated in labor-intensive industries.
- Identified heterogeneous drivers by market structure: innovation incentives and financial flexibility in competitive industries versus weaker competitive pressure reduce firms' incentives in more concentrated industries.
- Complexity score is highly related with valuations: patent-value measures reward higher complexity, whereas stock-return outcomes respond positively to complexity only up to a certain point

Work in Progress:

What Drives Corporate M&A Deals? (with Debarshi Nandy and Shubhranshu Shekhar)

The LLM Oracle Fallacy in Finance (with Debarshi Nandy and Shubhranshu Shekhar)

The Value of Disruptive Innovation (with Debarshi Nandy)

Home Grown versus Sourced Innovation: A view from M&As (with Debarshi Nandy)

TEACHING EXPERIENCE

Instructor, ECON 10A: Introduction to Microeconomics (Brandeis University) Summers 2024 ~ 2026

- Designed and delivered an undergraduate course covering supply and demand, consumer and firm behavior, market equilibrium, welfare economics, labor markets, income inequality, and poverty.
- Applied microeconomic theory to contemporary policy questions and real-world economic issues.

Instructor, ECON 25A: Oral Communication in Economics Practicum (Brandeis University) Fall 2024

- Trained undergraduate economics students to communicate economic research clearly to academic and nontechnical audiences.
- Guided students in presenting empirical economics papers and interpreting commonly used econometric methods.
- Introduced LaTeX Beamer and effective visualization practices for economics presentations.

RESEARCH ASSISTANT EXPERIENCE

Research Assistant (Team Leader), Corporate Finance Projects 02/2021 ~ 10/2022

Supervisor: Prof. Ye Zhang (Assistant Professor, Stockholm School of Economics)

Research on the Effect of Actual Controller on Firms' Performance

- Collected and coded information on reasons for changes in firms' actual controllers from annual financial reports.
- Cleaned data and constructed analysis datasets in Stata; implemented regression workflows examining relationships among shareholders, managers, and controllers.

Two-sided Discrimination in U.S. Entrepreneurial Finance: Evidence from Lab-in-the-field Experiments

- Reshaped survey responses into panel format (Excel macros) and performed data cleaning and statistical analysis in Stata.
- Replicated regression analyses on updated datasets and generated regression result tables; presented and provided feedback on related papers.
- Documented evidence of two-sided discrimination in founder-investor matching and connected findings to gender/race

patterns in the VC industry.

Research Assistant, Global Value Chain and China's FDI Upgrade

10/2018 ~ 07/2020

Supervisor: Prof. Youde Dong (Professor, Shanghai University)

- Reviewed literature on global value chains (GVCs), extracted key information, and synthesized insights for project development.
- Summarized GVC evolution and analyzed methods for measuring GVC embeddedness.

Research Assistant, Company Equity Value: Evaluation Methods & Applications

06/2017 ~ 04/2019

Supervisor: Prof. Yirong Ying (Professor, Shanghai University)

A New Method for the Exact Solution of Duffing Equation (Fourth Author, ISSN: 2327-4379)

- Constructed quotient trigonometric function, and used nonlinear algebraic equation set theory and method for the solution of nonlinear Duffing differential equation.
- Obtained the exact solution of Duffing equation with constant variation method, and solved cubic equations and general solution of the homogeneous equation of Duffing equation with appropriate function.

Dynamic Analysis of Rumor Spreading Mechanism Based on Life Cycle Model (Third Author, ISSN: 1742-7835)

- Analyzed how every acting is completed in the rumor spreading system with the approach of mathematical economics.
- Established the model to analyze the influence of rumor spreading on financial market and the turbulent evolution under the time-delay effect.

TEACHING ASSISTANT EXPERIENCE

ECON 135A: Industrial Organization (Brandeis University)

Fall 2025

HS 405A: Applied Econometrics (Brandeis University)

Spring 2025

FIN 240A: Venture Capital and Entrepreneurial Finance (Brandeis University)

Fall 2023 ~ 2026

FIN 254A: Modern Finance, FinTech, and Beyond (Brandeis University)

Spring 2023

CONFERENCE

2026 AFA Annual Meeting: PhD Poster Session

01/2026

- Paper: Industry Market Capitalization and Technology Complexity. Accepted for poster presentation

2025 Boston MRS International Risk Conference

07/2025

- Discussant for paper: AI, Machine Learning, and Corporate Finance

NBER Summer Institute 2024: Entrepreneurship Research Boot Camp (Selected participant)

07/2024

- Intensive research training in entrepreneurship and innovation

SKILLS

Programming: STATA, SAS, Python, R, C, C++, VB, MATLAB, Microsoft software
